

I am writing in regards to the recent news that the National Association of Broadcasters is attempting to limit or illiminate the right of Satalite radio in broadcasting local traffice and weather to metropolitan areas. I am very dissapointed to discover that the fcc would so easily be led to disregard an obvious infringement on first ammendment rights. This infringement is almost of worst type on first ammendment infringement because it deal with the relaying of information in the most traditional sense of our first ammendment rights. please support satalitte radios' right to broadcast news related information to its subscriber base.
